## BOPP & REUTHER MESSTECHNIK GMBH – SPEYER

Bopp & Reuther Messtechnik GmbH has been a competent partner in flow measurement technology for decades. With our comprehensive services we offer our customers for all common flowmeters (displacement meters, magnetic-inductive flow meters, mass meter, vortex meter, ultrasonic meters, turbine wheel meters, etc.) an individual service package:

- **Collection and return transport of measuring instruments / fittings**
- **Cleaning of chemically contaminated equipment according to VCI guidelines (German Chemical Industry Association)**
- **Decision support between repair and use of new equipment**
- **Repair of all flowmeters mentioned above**
- **Calibration on nationally and internationally recognized test benches for flow rates up to max. 1,200 m<sup>3</sup>/h**
- **Certified test certificates according to ISO 9001:2015**

In our diagnostic area, measuring instruments and fittings are decontaminated in accordance with VCI guidelines. We are audited by one of the largest chemical companies in the world and approved for the repair of contaminated measuring instruments.
